

# VIT

Stop Balanced Valve

- Easy opening and closing even under the maximum pressure
- High reliability for heavy and continuous duties
- Easy maintenance
- · Metal-to-metal seal

## **Options**

- Proximity switches
- · Actuator control unit
- Flanges kit
- Base frame
- · Body in stainless steel
- · ANSI Flanges drilling
- · CETOP or special flanges

## **Applications**

 Designed to be used to insulate high pressure and high flow rates lines in steel working and metallurgical industries

### Technical data

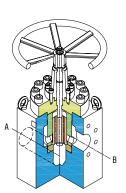

Fluid: Water and HFA
Working pressure: 35 MPa
Ambient temperature: +2°C ÷ +60°C

Connections: SAE6000 drilling up to size 10

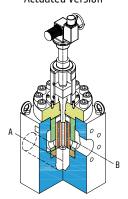

INOXIHP drilling from size 11

Materials: Body in carbon steel, internal parts in stainless steel

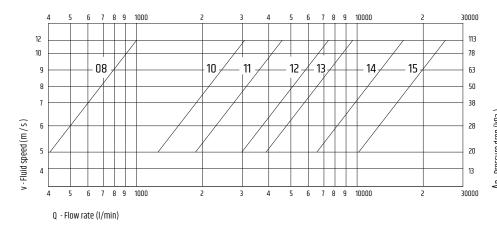

#### Actuated version
